

QI –
Quality Care Transitions

What do your Quality Measures Reflect for your Home?

Falls Infections

Pressure

Ulcers

Prepare for QI Transitions

- □ Care Transition Team
- ☐ Checklists upon readmission to LTC
- ☐ Team Huddles
- Root Causes

Adverse Drug Events

Contributing Factors

Sleep Disruption

Unfamiliar Surroundings

Lack of Activity

Medication Changes

Fluid and Electrolyte management

- Care Transition Adverse Events occur at a rate of 37.3%
- 70.4% are believed to be preventable

- Catorgorize Severity Events:
 - Less than serious (rash, skin tears)
 - Serious (PU, Fall, Pneumonia)
 - Life-threatening (Sepsis, Opioid Overdose)
 - Fatal

PIP IT:

Risk Factor

Trigger

Assessment

Post- Hospitalization

Factors to consider

- Functional ability
 - Mobility
 - Cognition
 - ADLs
- Quality of life
- What Matters
 Most to the
 resident and their
 family

Individual situations

- Prevention vs treatment
- Screenings
- Clinical status

Root Causes

- Hospitalizations
- Behaviors
- New Diagnosis
- MDS Coding errors
- Sleep Patterns
- Lack of Activity

Staffing Effects Quality...

Teamwork

- Team Approach
- Recognition and Celebrating Wins
- Communication
- Education
- Bonus upon Performance

•	What items should be on a checklist for care transitions? Let's create a checklist together.
